US Citizen in Towson, Maryland

Education & Certificates

- Bachelor of Science in Computer Science — Status – Graduating May 2027
- Google AI Essentials

Projects

Clashalytics – Clash Royale Statistics Web Application (Live Demo/GitHub)

- Designed and **deployed** a full-stack web application that allows Clash Royale players to search for player statistic and save profiles for convenient access.
- Integrated a **REST API** with **Java** and **Spring Boot** to retrieve Clash Royale player data, providing users with an accessible way to view and explore player performance.
- Implemented user registration, authentication, and **PostgreSQL** database integration to securely manage accounts and persist saved player profiles.
- Developed an interactive frontend using **React**, **JavaScript,** and CSS.

Bookie – Book Review Web-Application

- Collaborated with a team of four using **Agile** development practices to build a web application for sharing and discovering book recommendation/review.
- Implemented user authentication, book ratings, and review submissions, allowing users to create accounts and share feedback to help other evaluate books.
- Integrated backend database using **SQLite** to store user data and used version control to coordinate team contributions and manage code changes.

AI Discord Chatbot (GitHub)

- Developed an **AI**-powered Discord chatbot that answers user questions in real time.
- Implemented @mention-based interactions to let users request **AI** assistance directly within conversation, reducing the need to switch applications.
- Built message processing to deliver relevant responses using conversation and server context by handling **API** errors and response length to comply, improving the usefulness of AI-generated responses.

Work Experience

Ship Dock Associate at Amazon, Maryland — *April 2026 - Present*

- Handles final physical stage of order fulfilment by sorting, scanning, and loading outgoing packages and pallets for deliver.
